### ISOLUTION'S STRUCTURE

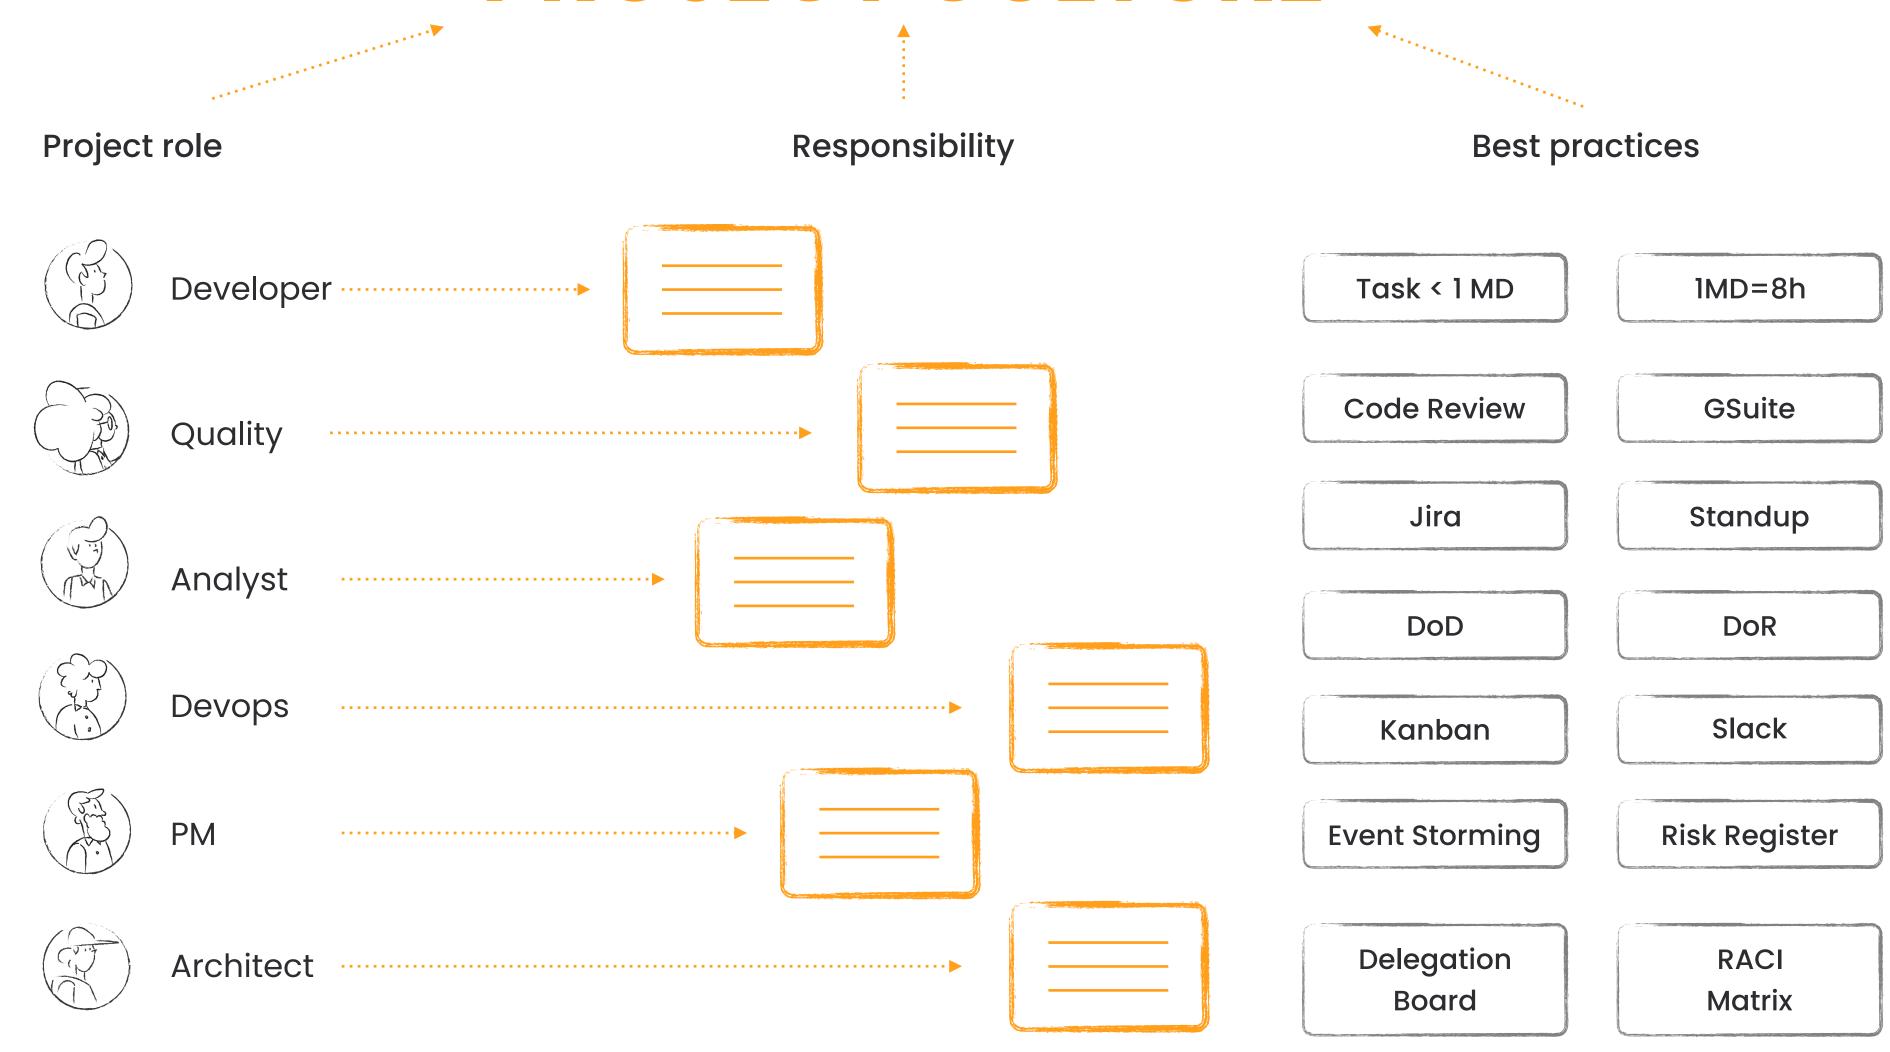

### HOW WE WORK

### PROJECT CULTURE

### We want to be sure that project/product is important to the client

- We work in agile methodologies
  - ▶ We settle on the basis of TS after each Sprint
  - ▶ The customer may resign from the cooperation at any time
- We want to be the cheapest in terms of cost, not price

Transparency

- The team is critical
  - ▶ The team has the right to make mistakes
  - ▶ Team estimation is "sacred"
  - We believe in the synergy effect
  - > We talk about problems when we notice them
  - ▶ Capacity of a person = 32h per week

### 6 We work using clear rules

- The backlog of tasks for the sprint is fixed
- ▶ Each task is saved and evaluated.
- ▶ The task estimates are <= 1 MD</p>
- ▶ A developer's working day (8h) is actually 5 hours of work
- We have Definition of Done (DoD)
- ▶ We have Definition of Ready (DoR)
- We fill TS every day
- We deliver working software every day
- ▶ DEMO is done by the customer
- ▶ Planning
- ▶ Priorities
- Sprint
- ▶ Error in estimation
- Waiting for work

### PRINCIPLES OF PROJECT IMPLEMENTATION

People Centric Culture

People, project, profit in balance

We want to be the cheapest in terms of cost, not price

Recruit for attitude train for skill

We all sell or help to sell

Leader to leader

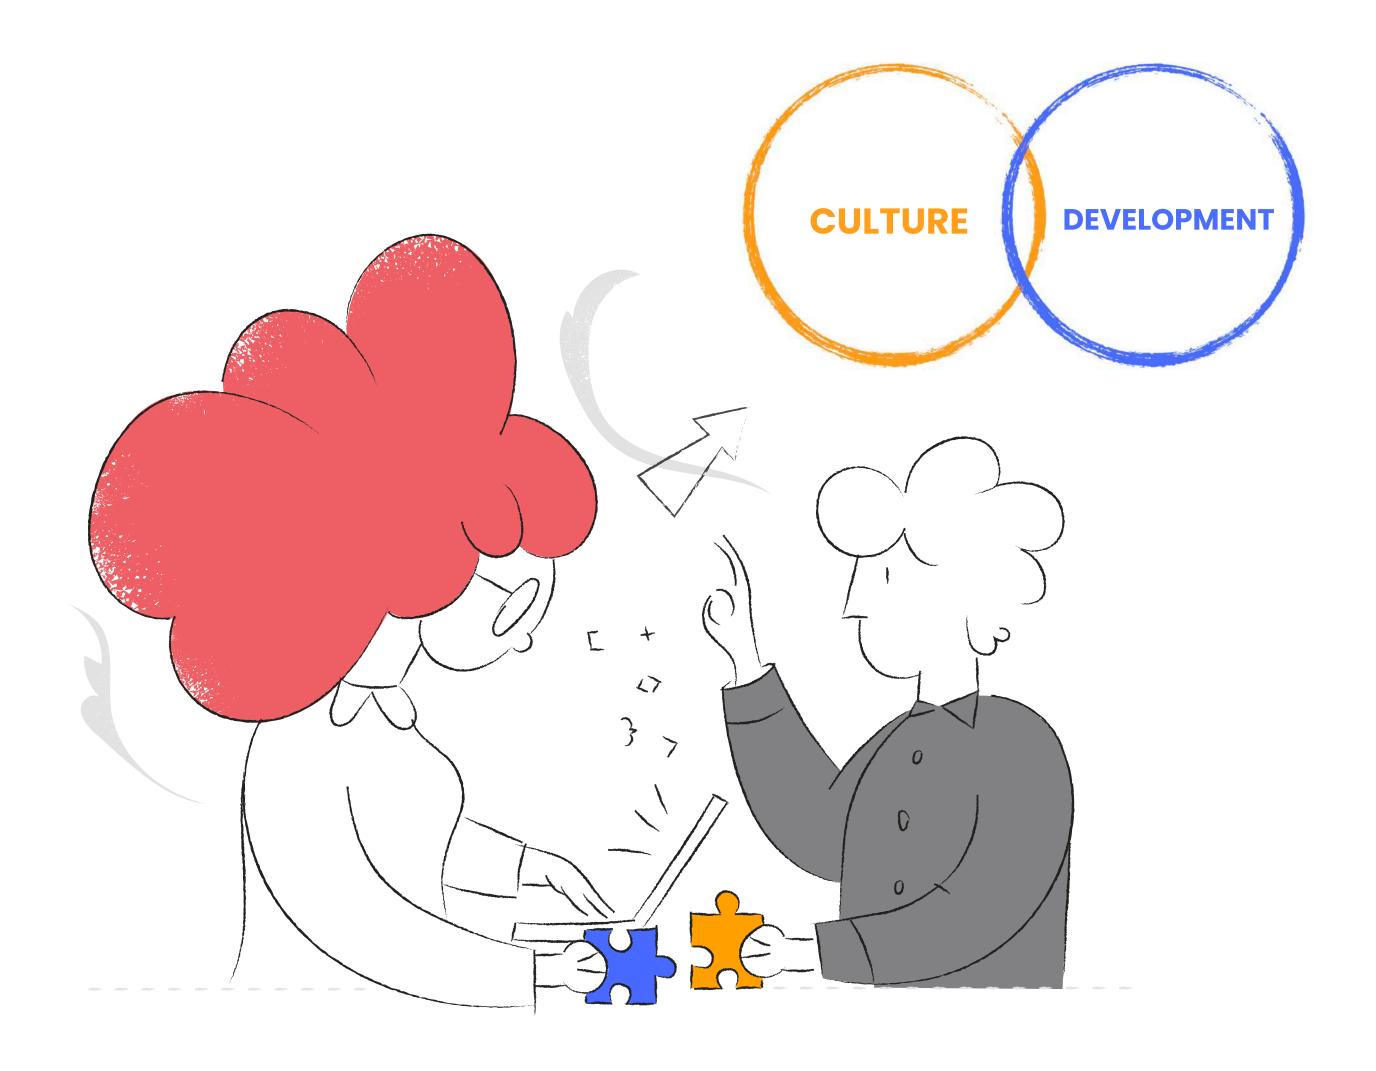

Trust, transparency and freedom instead of control

Clients want to work with us because of who we are

We make mistakes faster

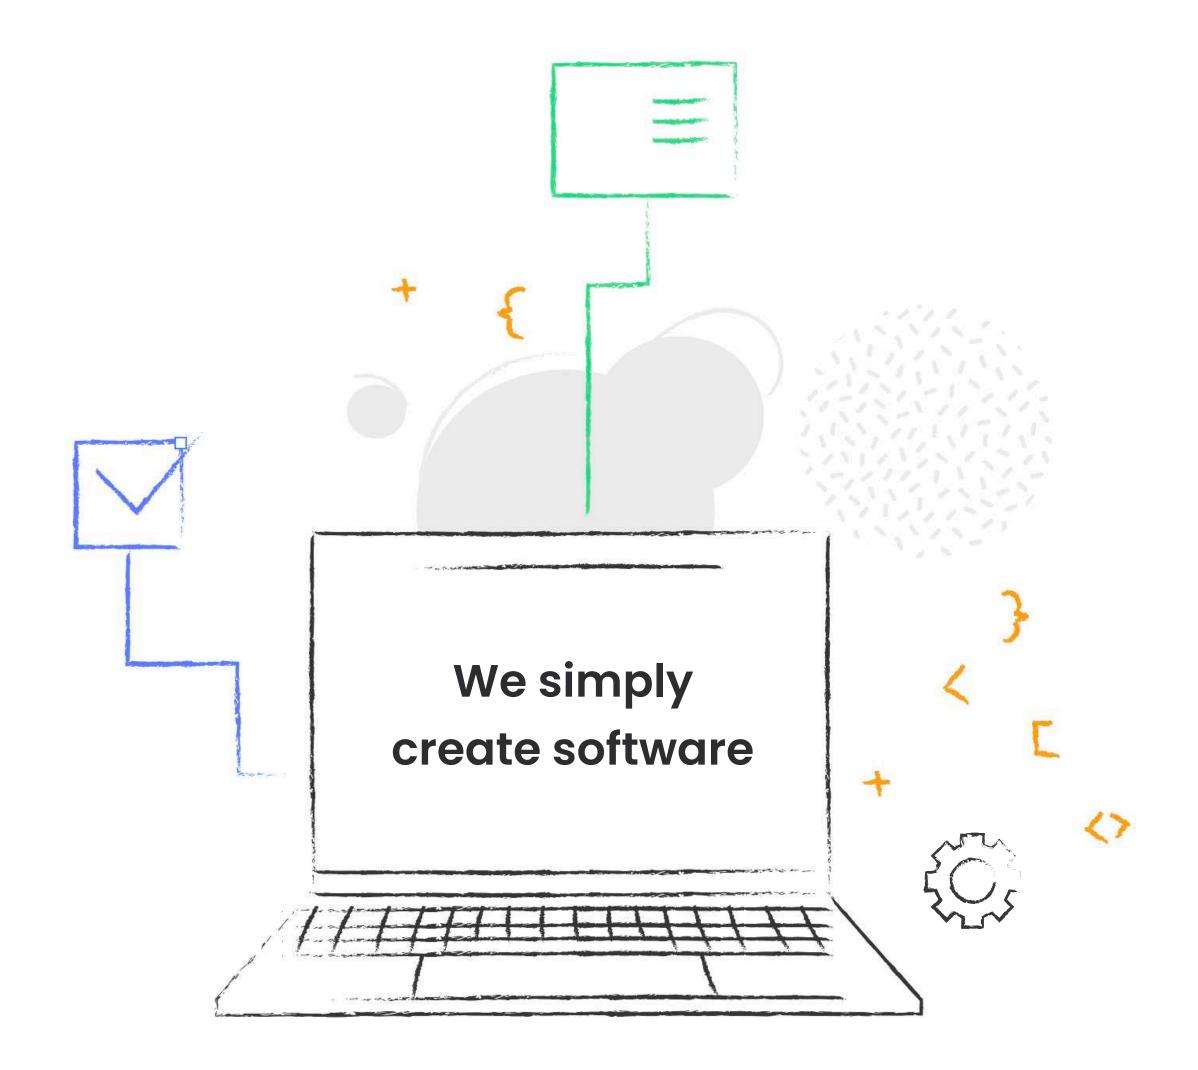

"Zero" HR
